Unit weight	6.3kgs/14lbs	
Hoist height	<b>A</b>	270mm
Spreader bar width open	<b>B</b>	600mm
Spreader bar width closed	<b>C</b>	356mm

## SPECTRA V3 PORTABLE HOIST

The new Spectra V3 Portable is a lightweight, easy-to-carry track hoist that has been designed to be used on SPECTRA track, whether ceiling-fixed or on a gantry.

The patented spreader bar, when folded out, offers the same width between suspension points as found on most non-portable track hoists, ensuring: compatibility with most types of sling and a comfortable sitting position for the service user.

### FOLD-OUT FULL WIDTH SPREADER BAR

When not in use the spreader bar folds away for optimum portability and ease of storage. There is a retractable carry handle on the top panel, which doubles as an attachment point for a through-door trapeze system.
